

## The Graduation Ceremony Speech

Ping Lu

Good morning, everyone. It's my honor to stand here today to give this speech! My name is Ping Lu. I came from China in March, 2014. It has been three months for me at the LINC school. In the past three months, we've had a wonderful time in the school and it has provided us with a good study place. Our school makes us feel comfortable, it's a warm big family, all the teachers care for us. Our school is very friendly, the study atmosphere is relaxing, the lively teaching way expands our thoughts silently, the teaching ways give us countless development spaces, let us foster independent study abilities and the exploration of our spirit. And this kind of ability and the spirit must profoundly affect us. Meanwhile, we have formed a cooperation team in teamwork, we have harvested friendships, realized the group's strength. We have grown up bit by bit, so we have to trust that the dots will somehow connect in our future and it will lead us off the well-worn path, and that will make all the difference.

What's more, our teachers are very patient and responsible. If anyone has any difficulty in study or daily life, they will give us a hand without hesitation. We have learned a lot from them, not only knowledge but also the way to solve problems in live. Thanks for our teacher's support and for helping us to understand the complexity of the human experience, and recognize eternal truths. All in all, we love our teachers, we like their responsibility, we also appreciate their spirit to work for the student's heart and soul.

I consider the days in LINC school are the greatest because I have developed my strong will, improve my comprehension abilities and made good friends. In daily life, I have met many problems in life and study, but overcome them all. In the process, I get improvement. In addition, I have developed deep relationships with my classmates while we study together. We help each other and make progress together, we share our happiness and sorrows and support each other, it's the support and sharing that make the days cherished. And today, I want to particularly speak to those of us preparing to graduate, however far you walk and however high you fly, our school will always back you up and be your dependable harbor. Our school believes and expects that you can be successful in your job, live happily and have a wonderful life.

I sincerely hope that you can have a nice journey and have a beautiful and awesome future.

At this graduation time, I wish our school grows stronger! Thanks LINC school and TBMA to help us live in Canada. Thanks teachers to give me this opportunity to speak. Thank you for listening.
